

AVRORA

PLAY-TO-EARN

**We've made making money on
cryptocurrency **easy and fun!****

Presentation edition of October 18, 2022

**INSTALL THE "AVRORA" GAME APP,
LINK YOUR NFT-GENERATOR,
AND EARN EVERY SECOND!**

AVRORA

OUR GOAL

To create an entire metaverse with its own economy and cryptocurrency mining!

Our team has extensive experience in the cryptocurrency industry. We analyzed many projects on the crypto market today, analyzed their mistakes and took only the best practices: **we reduced the total number of our tokens and the circulation of our NFTs, making the game interesting, exciting and evolving step by step!**

Avrora is a new spin on the gaming industry! We're creating an online strategy game that will eventually evolve into a full-fledged metaverse!

The game is interesting even to those who have never been interested in the gaming industry thanks to its simplicity of making money. And due to the well-established implemented mechanics, the game will be interesting to experienced gamers.

2.76 BTC

Once the game community is formed, the world will see our main creation: the metaverse!

THE DEVELOPMENT STRATEGY FOR THE METaverse INCLUDES:

- the use of blockchain technology (Web 3.0);
- the use of previously purchased NFT generators;
- making alliances with other players;
- building power plants;
- extraction of minerals;
- earn real money.

AVRORA

OUR TEAM

MR. IAN CHRIS JULIO ESTHER

Avrora CEO

Born on August 6, 1993, Parson Estate, Petit Paris, Seychelles. Studied Business and Sustainable Development at Liniversite Sesel, University of Seychelles, UniSey. In business since the age of 18. Has a great expertise in IT development.

PHILIP HOARO

Chief IT Officer

Born July 9, 1986. Graduated from the Massachusetts Institute of Technology, Department of Computer Science. Started programming at 15.

ALEXANDER TRUBNIKOV

Avrora's official representative in the Russian Federation

Born on December 24, 1989. Engaged in business since the age of 19.

Founder of the **VegTaste** vegan and raw food delivery network.

Co-founder of the **Black'n'White** project: blockchain-based mind games.

Co-founder of **DAO Go Green**, Clean-to-Earn, a decentralized autonomous environment care organization.

Co-founder of **Capsule Studio** project: developing branded NFT clothing for metaverse avatars.

AVRORA

DEVELOPMENT PROSPECTS

With the proceeds from the sale of NFT generators we will purchase bitcoin (BTC) mining equipment.

Our goal is to create one of the largest mining farms in Russia! This will give the owners of Level 15 NFT generators the opportunity to earn bitcoins almost indefinitely. At the current rate of mining, the last BTC will only be mined in 120 years! This idea allows every user to recoup their investment and earn money, which is important for us.

Usually, the first users joined at the early stages of project development get the biggest earnings, and those who enter projects later recoup their investment longer. Therefore, at each new stage of project development, we will give new users bonuses from new products. We will be giving purchasers, starting with the #30,001 NFT generator, plots of land in the Aurora metaverse. Each of these plots will have real value.

Thus, you will have both an NFT generator and a plot of land in the metaverse - a double benefit!

Having both an NFT-generator and a plot of land in the metaverse, you could mine a MetaAVR token. And if your NFT generator is leveled up to the 15th level, you will also be able to mine BTC. In the Aurora metaverse, you will be able to rent your NFT generators and plots of land out. **Eventually, you'll get a passive income, even without playing the game.**

To solve any disputes, we have created a "Book of Complaints", thanks to which we can hear everyone and adjust the development of the project.

We have also created a "Book of Appreciation and Wishes"!

DAO

Decentralized
Autonomous
Organization

A DAO is a fully automated business structure that is managed by all of its members rather than a single headquarters of top executives.

Decentralized Autonomous Organizations (DAO) have become the gold standard for projects seeking to create self-sufficient apps and services in the blockchain industry.

We stand by the philosophy of decentralization. Therefore, one of our goals is to create a DAO within which anyone can influence the development of the project.

Every NFT generator holder will be able to make any suggestions about the further development of the project and take part in votes.

NFT GENERATORS

PURCHASE OF NFT GENERATORS

From our marketplace, you can buy NFT generators that will generate AVR tokens for you.

PROFIT

Profits from NFT generators are credited to your balance in the app on a daily basis.

Your referral bonuses are also credited there.

WITHDRAWAL OF FUNDS

Withdrawal can be made on a daily basis from the trading balance.

MAINTENANCE

New game mechanics will constantly be added to our mobile game app: maintenance, oil refueling, etc.

GAS REFILLING

NFT generators need to be manually refilled with gas every 48 hours. The price of refilling with gas: 4% of the tokens generated by your NFT generator.

Only regular refilling of the NFT-generator will ensure its uninterrupted operation and token generation!

WITHDRAWAL AND RESALE

You can withdraw your NFT generator from the app. Withdrawal time is 30 days. Before withdrawing the NFT generator you need to fill it up, pay the depreciation and wear and tear fee. The fee for selling/reselling the NFT generator on the Marketplace is 6%.

NFT GENERATOR RESALE

Pay for the depreciation of your NFT generator,
paying 10% / 30% / 50% / 70% / 90% depending on how long the NFT
generator has been running:

1-3 months: 10% depreciation fee;
Months 3-6: 30% depreciation fee;
Months 6-9: 50% depreciation fee;
Months 9-12: 70% depreciation fee;
More than 12 months: 90% depreciation fee.
After that, the % does not increase.

**If you want to withdraw your NFT generator, you will need to pay
for its depreciation.**

**If you do not plan to withdraw your NFT generator, you do not have
to pay a depreciation fee.**

Every user can try the NFT generator for free during 3 days
using the special promo code received from the Telegram bot, the link
to which you can request from your inviter.

UPGRADING NFT GENERATORS

When you level an NFT generator up (buying additional parts), its price increases.

If you upgraded your NFT generator, you will be able to sell it at a higher price.

After installing an additional part, the NFT generator will start to generate a higher number of AVR tokens. All the additional parts are installed on the NFT generator in order of priority, without any skips: first part #1, then part #2, and so on.

MAINTENANCE OF NFT GENERATORS

The mechanics of the game will become progressively more complex: you will need to fill up the oil regularly, undergo the maintenance, and so on.

For the first year after the purchase of an NFT generator, maintenance will be done at Avrora's expense. From the second year onwards, it will be fee-based.

The maintenance will have to be done once a month.

The NFT-generator operation will be suspended for the duration of the maintenance:

1st maintenance takes **3hrs**

2nd maintenance takes **6hrs**

3rd maintenance takes **12hrs**

4th maintenance takes **24hrs**

5th maintenance takes **48hrs**

6th maintenance takes **96hrs**

96 hours is the maximum time of maintenance, which will not be increased further.

AVRORA

NFT-TURBOGENERATOR 110 STANDART 20SV

PRICE:

110 AVR

FIRST BATCH: 10,000 PCS.

TOTAL ISSUE: 33,500 PCS.

Basic version

if all conditions of the game are met, it generates up to 22 AVR per month

Complete version (with all upgrades),

if all conditions of the game are met, it generates up to 126.5 AVR per month

AVRORA

ADDITIONAL PARTS FOR NFT-TURBOGENERATOR 110 STANDART 20SV

		PRICE, +10% FEE	ADDS PER MONTH	INSTALLATION TIME
	Radiator 83CE	6,09 AVR	+ 1,57 AVR	1 day

NFT GENERATORS TOKENOMICS

INITIAL EMISSION AND FINAL SUPPLY OF NFT GENERATORS

NFT-TURBOGENERATOR	PRICE	INITIAL EMISSION	FINAL SUPPLY
NFT-Turbogenerator 110 Standart 20SV	110	10 000	33 500
NFT-Turbogenerator 550 Uncommon GS1000-2R	550	2 000	10 000
NFT-Turbogenerator 1100 Rare G-180-M	1 100	1 000	5 000
NFT-Turbogenerator 5500 Epic R-Turbo-Z	5 500	200	1 000
NFT-Turbogenerator 11000 Legendary R-Turbo-10	11 000	100	500

Initial emission: 13,300 NFT generators.
Final supply: 50,000 NFT generators.

NFT generators are created on the Binance Smart Chain
(BSC) BEP-721 network.

AVRORA

NFT GENERATORS TOKENOMICS

To avoid hyperinflation of the AVR token:

1. Once 20,000 NFT generators are sold, their performance will be reduced by 5%.
2. Once 30,000 NFT generators are sold, their performance will decrease by another 5%.
3. Once 40,000 NFT generators are sold, their performance will be reduced by another 5%.
4. When 50,000 NFT generators are sold, their performance will be reduced by another 5%. This will be the last capacity reduction.

Once the Avrora metaverse is launched, these 50,000 NFT generators will generate MetaAVR tokens.

To generate MetaAVR tokens, the user will need to have a purchased or leased land plot in the Avrora metaverse.

If you don't want to buy or rent land in the Avrora metaverse, you can sell or rent out your NFT generator.

If you have upgraded your NFT generator to the 15th level, regardless of whether you have a plot of land, you can participate in the distribution of mining profits and receive bitcoins (BTC).

ADDITIONAL INFORMATION

LAND PLOTS

Planned number of land is limited to 50,000 plots of different prices. There will be expensive plots with "meta-gas" and "meta-oil" fossils. 30,000 plots will be offered for sale at the same time in the "quick hands" format: **FCFS - "First Come - First Served"**.

NUMBER OF PARTICIPANTS

The initial number of participants will only be 50,000! We can increase the number of possible participants by 30,000 users. We plan to give 20,000 plots to owners of NFT generators, starting with #30,001.

RENT

Land in the metaverse can be rented out to install your NFT generators on it. NFT generators can be rented out for passive income.

PRIORITY

Owners of NFT generators will be a priority after the launch of the metaverse. Buyers of land will be able to rent NFT generators from the owners.

WARRANTY

The NFT generator is warranted for 1 year. The performance of the NFT generator will be as stated, except for the rules prescribed in tokenomics.

LENGTH OF LIFE

After 1 year of operation, the number of tokens generated decreases.

GIFT

For every NFTgenerator bought starting from #30,001 we will gift land plots in the Avrora metaverse equal to purchased NFT generators value.

BTC MINING

Our goal is to organize mining farms using the proceeds.

With the proceeds from the sale of NFT generators, Avrora will buy bitcoin (BTC) mining equipment.

All owners who upgraded their NFT generator up to level 15 will be able to receive not only AVR, but also bitcoins (BTC).

Bitcoins will be distributed according to a certain algorithm among the owners of NFT generators upgraded to level 15.

AVRORA

The work of the mining farms will be broadcasted on the official Avrora website 24 hours a day, 7 days a week online.

Profit from the mining farms, after deducting the costs of rent, taxes, electricity, etc., will be distributed as follows:

- **40% to the owners**, proportionally to the price of their level 15 NFT generators;
- **40% to Avrora**;
- **20% - will be reserved** for the purchase of mining equipment, etc.

To reach the 15th level, it takes about 4 months per NFT generator:

- an additional part of level 1 is installed within 1 day;
- an additional part of level 2 is installed in 2 days;
- an additional part of level 15 is installed in 15 days.

The total number of bitcoins that can be mined is 21 million. 18.6 million BTC, almost 90%, have been already mined. There is just over 10% or about 2.2 million BTC left to mine. At the current mining rate, the last BTC will be mined in about **120 years!**

As the years go by, the price of BTC, considering the periods of falling in the bear market and the periods of its growth in the bull market, will only grow. Even though bitcoin mining becomes more and more difficult with time, due to its price growth, **mining remains a promising and stable direction** to maintain the project.

PROFIT ALLOCATION

Bitcoins, received from mining, are credited to users daily, their amount can be seen at any time in the account.

At the same time, payments are made once a month.

- The amount of profit received from mining is divided by the total number of efficiency units of all owners of NFT generators.
- 1 unit of efficiency (UE) = 100 AVR.
An efficiency unit can only be a whole number, decimals are cut off.
- For example, if the sum of all Level 15 NFT generators is 1,000,000 AVR, this equals 10,000 units of efficiency (UE).
- Dividing the amount of mining profit by the number of efficiency units in the reporting period, we get the efficiency coefficient (EC).
- Multiplying the number of efficiency units (UE) by the efficiency coefficient (EC) we obtain the amount of profit from mining

AVR

AVR Tokenomics

AVR token is developed on the Binance Smart Chain (BSC) BEP-20 network.

Supply is limited to **50,000,000 AVR tokens**.

AVR TOKENS DISTRIBUTION

At the initial stage, the price of 1 AVR = \$1. After the AVR token is listed on exchanges, its price may move either way.

After all AVR tokens are mined, we will introduce additional mechanics into the game:

- Launch of the Avrora metaverse, where you could mine MetaAVR, MetaGAS, MetaOIL tokens;
- Mined bitcoins (BTC) allocation.

AVRORA

REFERRAL PROGRAM

9% of tokens from sales of Avrora* goods and services are distributed through the marketing referral program.

***1% of tokens from sales of goods and services go to Avrora.**

It is not necessary to have an NFT generator to get the referral bonus: all you need is to sign up for an account in the Avrora mobile app.

You will immediately have the opportunity to earn from your sales:

Line I - 5%;

Line II - 2%.

NFT-Turbogenerator 110 Standart 20SV

gives you the opportunity to receive bonuses on **Lines 1 and 2.**

NFT-Turbogenerator 550 Uncommon GS1000-2R

gives you the opportunity to receive bonuses on **Lines 1 and 2.**

NFT-Turbogenerator 1100 Rare G-180-M

gives the opportunity to receive bonuses from **Lines 1-6.**

NFT-Turbogenerator 5500 Epic R-Turbo-Z

gives the possibility to get bonuses from **Lines 1-8.**

NFT-Turbogenerator 5500 Legendary R-Turbo-10

gives the opportunity to receive bonuses from all **9 Lines.**

AVRORA

MARKETING PLAN

NFT-TURBOGENERATOR

11000 Legendary R-Turbo-10 **10 000** AVR **0,05%** from purchases of the level **9**

MetaAVR token and BTC mining

With the end of the mining of 50,000,000 AVR in the Avrora metaverse, a new stage begins: **the MetaAVR token comes into play.**

The launch of the MetaAVR token will be designed based on the AVR token experience. Users who don't have an NFT generator, but have a piece of land in the Avrora metaverse, will be able to team up with those who have NFT generators.

NFT generators can be rented out.

If you want to mine AVR token or MetaAVR token together with BTC, you have to get your generators upgraded to level 15.

To mine MetaAVR token, you need not only an NFT generator, but also a piece of land. You have to place a power plant on that plot of land, where the NFT generator will work. The land can be bought or rented.

You can rent your NFT generator to the owner of a land plot and get a passive income, even without logging into the game every day!

R O A D M A P

Q1 2022

- Development of the App.
- Website development.
- Tokenomics development.

Q2 2022

- Creation of limited edition NFT generators.
- Implementation of mechanics for upgrading NFT generators.
- Implementation of AVR token burning with each user's purchase of additional parts to prevent hyperinflation.

Q3 2022

- Airdrop.
- Launch of mobile version of the App.
- Official launch of the project.
- International promo campaigns.
- Gradual organization of mining farms and introduction of online broadcasting options.

Q4 2022

- Creation of a p2p marketplace.
- Development of own marketplace.
- Implementation of the engines withdrawal to the marketplace.
- Creation of an exclusive collection of engines.
- AVR token listing on DEX exchanges.
- Creation of a decentralized autonomous organization (DAO).

Q1 2023

- Release of MetaAVR tokenomics.
- Airdrop for existing and new members.

Q2 2023

- Expansion of mining farms.
- Opening of metaverse land plots sale.
- Launch of the metaverse.
- Development of mining heating equipment.

Q3 2023

- Listing of MetaAVR token on exchanges.
- Introduction of MetaOIL and MetaGAS internal tokens into the metaverse.

Q4 2023

- Release of a collection of limited edition NFT generators.
- Opening another location for bitcoin mining.

Q1 2024

- Bringing the number of running mining farms to 1,000 units.
