AVRORA AS THE FUTURE OF P2E

◆ AVRORA+

Welcome to the innovative cryptocurrency world, where income becomes an engaging game.

It's a game application that converts the traditional approach to financial participation and rewards by combining blockchain technologies, NFT, and DAO.

AVRORA+

With our application, you can start making income every second of the day by purchasing an NFT generator.

Thanks to Avrora, the process of earning money with cryptocurrency became simple and accessible to everyone.

ABOUT "AVRORA+"

OUR GOAL

GAME UNIVERSE

Avrora was initially created with a primary focus on the sustainability of the AVR token and the entire project in general, including mining, excluding complex game mechanics.

Our task is to implement a simple but addictive economic game that will not require a significant investment of time from the user but will be aesthetically pleasing and help to improve his mood.

The concept of Avrora is based on creating a sustainable and stable gaming environment. We provide a limited number of tokens and NFTs to maintain sustainable economic growth, which ensures that the game remains attractive at all stages, providing opportunities for economic development and profit for players.

WEB 3.0

AVRORA

THE ADVANTAGES OF AVRORA

01

RELIABILITY AND TRANSPARENCY

The project has been showing stable work on the market since August 15, 2022. The tokenomics of the project, including smart contracts, are open to the community to observe. It emphasizes the transparency of the project.

02

STABLE PROFITABILITY

Avrora offers stable monthly profitability averaging between 10 and 20 percent. Thanks to carefully thought-out mathematics, the payback in tokens can be calculated up to one day

03

SUPPORT AND TRAINING

On the platform, you can find the activity reward ranking system. Moreover, participants are offered the opportunity of mentoring in a team with top project leaders, including team training with Andreas Thyssen

04

ACTIVE AND FRIENDLY COMMUNITY

Avrora is proud of its community, where mutual help and understanding between members and developers is non-negotiable.

05

BASED ON WEB 3.0 AND NFT

The project is based on Web 3.0. It means that every participant who invests in an NFT generator actually owns it (confirmed by a record in the blockchain).

With Avrora, you will get confidence in the future!

AVRORA+ ECOSYSTEM

REVOLUTIONARY PLATFORM

Ecosystem Avrora+ is a revolutionary platform based on the principles of blockchain and cryptocurrency.

You can purchase and upgrade NFT generators on the Avrora marketplace, and also complete simple tasks to earn Avrora tokens as rewards.

SECURITY AND CONVENIENCE

The AvroraTokens and NFTs provide access to a wide range of opportunities within the ecosystem of Avrora: participation in DAO voting, interactions with robots, participation in competitions, and interactions with other members of the community.

The generators that you invest in will be the main source of your income, so make sure to increase their efficiency and profitability by upgrading them. Use our convenient application to monitor your success and progress within the ecosystem of Avrora.

NFTS AND THEIR APPLICATION

In the world of cryptocurrencies, Avrora NFT generators serve as a digital passport for long-term token mining.*

*(These NFT generators not only guarantee security (every transaction is recorded and validated in the blockchain) but also provide stable token mining.)

Looking into the future, we are confident in the growth of our ecosystem, which will increase the value of NFTs and strengthen their role in bitcoin mining. Avrora NFT generators are your ticket to the future of bitcoin generation.

AVRORA+ MARKETPLACE

The Avrora+ marketplace is a digital platform where ecosystem participants can purchase, sell, or barter NFT generators.

◆ Everyone has an equal opportunity to evaluate the potential of NFTs and invest in the future of their journey in the world of crypto by purchasing from the catalog.

◆ Marketplace Avrora+ is your gateway to the world of NFTs and cryptocurrencies, combining convenience, transparency, and security of trading operations.

INTERACTIONS WITH THE NFT GENERATOR

BUYING NFT GENERATORS	RECEIVING A PROFIT	TOKEN WITHDRAWAL
<p>The NFT generators you decide to purchase from our marketplace will be the source of AVR tokens generation.</p> <p>/01</p>	<p>The processes of generating income from NFT generators and accruing referral bonuses are automated, and these funds are credited to your game balance in the application daily.</p> <p>/02</p>	<p>Withdrawing AVR tokens from the balance of NFT generators is possible once every 24 hours. To do that, you need to click on the «Withdraw» button on the marketplace, after signing in to Metamask or any other crypto wallet.</p> <p>/03</p>

We constantly update our mobile gaming application, adding new elements of game mechanics such as NFT generators' upgrades and maintenance.

UPGRADING NFT GENERATORS

By upgrading your NFT generator with additional details, you upgrade its price and increase the production of AVR tokens. Let us note that additional details' installment occurs sequentially.

When you upgrade your NFT generators, you can sell them for a higher price.

MAINTENANCE

Avrora undertakes the maintenance of the generator in the first year after purchase. Starting from the second year, the maintenance is paid and must be performed every month.

Maint. No.1 for 3 hours;	Maint. No.4 for 24 hours;
Maint. No.2 for 6 hours;	Maint. No.5 for 48 hours;
Maint. No.3 for 12 hours;	Maint. No.6 for 96 hours.

96 hours. - maximum maintenance time, which will not be increased.

DEFLATIONARY TOOLS

MECHANICS	30-DAY GAME EXPENSES
Gas filling	1% from the price of an NFT in AVR
Oil replenishment	1% from the price of an NFT in AVR
Depreciation payment	2% from the price of an NFT in AVR

WHEN YOU BUY AN NFT GENERATOR:

90% OF THE TOKENS GET BURNT

(withdrawn from circulation, increasing the value of the asset).

9% GO INTO THE REFERRAL STRUCTURE

The amount of burnt AVR tokens is displayed in the marketplace.

1% GO INTO THE COMPANY RESERVE

TOTAL AVR

19 144 619 50 000 000

BURNT AVR

30 855 381 50 000 000

WITHDRAWAL AND RESALE

You can withdraw your NFT generator from the application. The withdrawal occurs within 30 days. Before withdrawing an NFT generator, you have to fill the gas and pay depreciation and wear and tear fees.

The NFT sale/resale commission on the marketplace is 6%.

NFT GENERATOR IMPROVEMENTS

When you improve your NFT generators, you open up new possibilities!

Upgrading to the 15th PRO level of the generator will take only 30 days and you will receive a distribution of BTC profits from the project's mining equipment.

It will take 55 days to reach the 20th PRO MAX level and your generator will start mining 10% AVR from the base value.

- ◆ Installation of 1-5 parts takes 1 day;
- ◆ Installation of 6-10 parts takes 2 days;
- ◆ Installation of 11-15 parts takes 3 days;
- ◆ Installation of 16-20 parts takes 5 days.

GENERATORS' STRUCTURE AND FUNCTIONALITY UPDATE

New generators that have been purchased immediately receive maximum profitability.

During the first three months after purchase, the generator provides maximum profitability. Then, after three months, the percentage profitability of the generator is reduced by 5%.

TIME AFTER PURCHASE	DECREASE IN YIELD (%)	TOTAL DECREASE
3 months	-5%	-5%
6 months	-5%	-10%
9 months	-2%	-12%
12 months	-1%	-13%

Passing the semi-annual mark, the yield of the generator is reduced by an additional **5%**.

Upon reaching the nine-month period, the percentage yield of the generator is reduced by **2%**.

And finally, one year after the date of purchase, the generator's profitability is reduced by an additional **1%**.

As a result, after a year of operation, the generator's total profitability decreases by 13%.

The Aurora system is strategically focused on accelerating return on investment and delivering sustainable high returns for users.

NFT GENERATOR DETERIORATION

An important feature of working with NFT generators in Avroa is their depreciation.

Deterioration percent

Depending on the period of use, a certain percentage of wear is imposed on the generator:

*Deterioration percentage does not increase after 12 months of use.

NFT GENERATOR WITHDRAWAL

If you want to withdraw the NFT generator, you need to pay the depreciation corresponding to how long you have been using it.

It is worth noting that new users have a unique opportunity to test the NFT generator for free for 3 days.

Our system offers flexible conditions for working with NFT generators, allowing users to manage their assets in the most efficient and convenient way.

If you don't plan to withdraw the NFT generator from the game, depreciation payment is not required.

To do this, you need to use a special promo code, which can be obtained from the inviter through our Telegram bot.

AVRORA+ APPLICATION

Your personal pocket assistant, that is
always there when needed

- ◆ Daily income calculation
- ◆ Convenient storage of NFT generators
- ◆ News and updates in instant availability

AVR TOKEN

AVR

It is a token based on Binance Smart Chain (BSC), with a limited supply of 50,000,000 tokens.

AVR TOKENS DISTRIBUTION

69% P2E 34 500 000 AVR

5% LIQUIDITY 2 500 000 AVR

6% RESERVE 3 000 000 AVR

9% MARKETING 4 500 000 AVR

11% TEAM AND CONSULTANTS 5 500 000 AVR

PRICE

In the beginning, the price of one AVR token is \$1. But after the AVR token appears on the exchanges, its price may either increase or decrease.

When all AVR tokens are mined, we will expand the gameplay and users will be able to participate in the distribution of mined bitcoins (BTC).

THE AVR STAKING

AVRORA+ STAKING FUNCTION

In our staking program, participants can stake their tokens for a period of 3 to 12 months, earning increasing annual interest rates depending on the chosen period.

Interest is calculated every minute and can be withdrawn at any time using the button [Claim](#)

Period, months	Pool limits	Percentage, per annum	Percentage, month
3 months	30.000 AVR	36% per annum	3% per month
6 months	60.000 AVR	72% per annum	6% per month
9 months	90.000 AVR	108% per annum	9% per month
12 months	120.000 AVR	144% per annum	12% per month

IMPORTANT

Please note that staked amount can only be withdrawn after the end of the staking period without commission. If the user decides to withdraw early, a fee of 75% of the staking amount will be charged.

RE Stake

For those who want to maximize their profits, we offer the ReStake (reinvestment) feature. If the user decides to open a new stake, they will need to create a new stake.

SECURITY AND CONVENIENCE

Our marketplace provides detailed statistics for each staking option, as well as displays the user's token balance and staked tokens.

Staking in Avrrora 2.0 is fully integrated with Web 3.0 and MetaMask, providing security and convenience for our users. Profit from staking is distributed through a separate smart contract, and staked tokens are stored in a secure smart contract.

THE DEFLATIONARY TOOL "COMMISSION"

◆ COMMISSION

This is a flexible deflationary tool implemented in AVRORA. The commission is charged when transferring AVR tokens from the trading balance of the NFT generator to the game balance and is aimed at stabilizing the tokenomics of the project.

01

◆ PROFITABILITY

With the growth of the AVR token rate on the exchange, the "Commission" is reduced and contributes to an increase in the profitability of users. Thus, these mechanics play an important role in maintaining a healthy economic space in AVRORA.

02

THE TRANSITION OF THE ECONOMY FROM AVR TO META AVR

01

There is no commission for withdrawing tokens to the trading balance. Now tokens mined by generators can be accrued to the trading balance without commission.

02

The AVR staking pool will only be open for contributions one month after the Aurora Plus upgrade, to make it harder for AVR tokens to be replicated in the future.

03

Burning 29,000,000 AVR stored on smart contracts. AVR tokens will no longer be mass mined by generators but will remain essential for every generator owner.

Staking will become the main way to earn AVR. Accordingly, it is AVR tokens that will be needed to pay for all consumables of generators in the game, which will increase the demand for AVR tokens.

04

In the first month following the change, the old generators will mine AVR tokens and the new generators will mine MetaAVR tokens. One month after the update, the old generators will only mine MetaAVR tokens, and their profitability will depend on the time they have existed, according to the new deflation model.

05

The generator, when upgraded to level 20, in addition to MetaAVR and Bitcoin, begins to generate AVR tokens (10% of the base cost of NFT, excluding the upgrade level).

With the update, installment payments for old generators will be made in AVR tokens. However, one month after the update, these payments will need to be made in MetaAVR.

THE META AVR TOKEN

When 50 000 NFT generators are sold - the release of the MetaAVR token is announced

The tokenomics of the MetaAVR token (hereinafter MAVR) is implemented as double the tokenomics of the AVR token:

◆ INITIAL MAXIMUM EMISSION:	100%	100 000 000 MAVR
◆ PLAY-TO-EARN:	69%	69 000 000 MAVR
◆ TEAM AND CONSULTANTS:	11%	11 000 000 MAVR
◆ MARKETING:	9%	9 000 000 MAVR
◆ RESERVE:	6%	6 000 000 MAVR
◆ LIQUIDITY:	5%	5 000 000 MAVR

AVRORA+ DAO

DECENTRALIZATION

As part of the development of the Avrora game, special attention is paid to strengthening the principles of decentralization and involving players in the process of making key decisions.

IN THIS CONTEXT, THE DECENTRALIZED AUTONOMOUS ORGANIZATION (DAO) AVRORA WAS LAUNCHED.

DAO is an innovative form of organization that gives each participant the opportunity to influence the development of the project.

Members vote for or against proposals and the results of these votes directly affect the future of Avrora.

The first DAO voting in Avrora was launched on our marketplace.

[\(https://avrora-market.com/\)](https://avrora-market.com/)

All participants have the opportunity to participate in the development of the project by voting for or against the proposed changes in the voting.

As part of the voting, a number of changes are proposed in the development plan of our project. Previously, we strictly followed the written plan, but now, given the change in the direction of the project, some tasks need to be moved to other quarters and new tasks of higher priority should be added.

THE BTC MINING

Avrora invests in mining farms using funds from the sales of NFT generators.

OUR GOAL

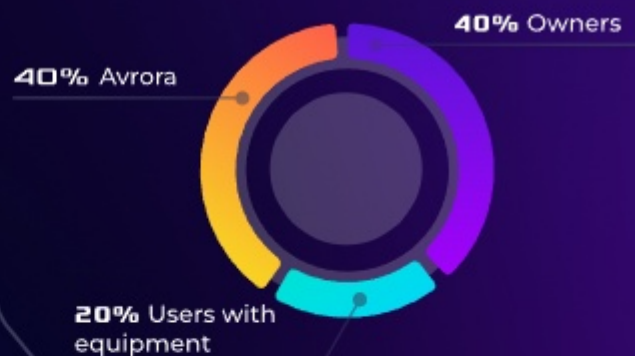

Our goal is to provide you with the opportunity to earn not only AVR tokens but also Bitcoins (BTC) if your NFT generator has reached level 15.

We use **Asic S19 j pro 104 mining equipment**, which is distributed among users with certain NFT generators.

DISTRIBUTION

Mining farm revenues (after costs) are shared between owners (40%), Avrora (40%), and hardware users (20%).

The total number of bitcoins available for mining is 21 million and there are about 2.2 million BTC left to be mined. Despite the increase in mining difficulty, mining remains promising due to the increase in the price of BTC

Avrora+ makes mining affordable and stable for all users!

BTCB PAYOUT POLICY

GENERAL PROVISIONS

BTCB payouts are carried out between all Avrora players who upgraded their NFT generators to level 15 (pro) or higher (NFT Robot does not participate in the distribution). The payouts occur through the BTCB smart contract that guarantees the security and transparency of all transactions.

PAYOUT CALCULATION

- 01 The cost of electricity is deducted from the total profit, thus obtaining a net profit.
- 02 40% of the net profit is distributed between players who upgraded their NFT generators.

PROFIT DISTRIBUTION

- 01 40% of the net profit goes to the company.
- 02 20% of the net profit is used to purchase new ASIC mining equipment.

CONDITIONAL DISTRIBUTION UNITS

Depending on the type and level of a generator, each participant is assigned a certain amount of "Conditional Distribution Units". These units help determine each participant's share in the total payout pool.

PAYOUT CALCULATION FOR EACH PARTICIPANT

- 01 The total amount of payouts (40% of the net profit) is divided by the total amount of conditional distribution units.
- 02 The resulting value (x) is multiplied by the number of conditional units of each participant to determine its payout.

PAYOUT SCHEDULES

All payouts occur on the fifth of each month to addresses specified by the users in the Avrora application. Users can specify or change their payout addresses until the fourth of each month. If an address isn't specified before that date, the payout will only occur next month.

OBTAINING AN ADDRESS FOR PAYMENTS

To receive a payout you need to have your personal wallet supporting BTCB, as an example, Metamask is one of them. In Metamask you can obtain a payout address by clicking on the account icon at the top of the application. You need to specify that address in the Avrora application.

SECURITY

Make sure you enter the correct payout address and upgrade your generator to the required level to be eligible for payouts. Never share your private key or recovery phrase with anyone, including Avrora employees.

SUPPORT

If you have any issues or questions, you can always contact our support team. We are always ready to help you and ensure the most comfortable and safe use of our platform.

THE BONUS PROGRAM

REWARD SYSTEM

An additional reward system for leaders will be introduced depending on their success.

Now, in addition to a permanent earning bonus for generators that have reached a certain rank, members will also receive a bonus percentage of their generators' earnings based on their achieved monthly turnover from the first line:

- ◆ UPON REACHING 1000 TOKENS PER MONTH - AN INCREASE IN EARNINGS BY 0.5%
- ◆ UPON REACHING 5000 TOKENS PER MONTH - AN INCREASE IN EARNINGS BY 1%
- ◆ UPON REACHING 10,000 TOKENS PER MONTH - AN INCREASE IN EARNINGS BY 2%
- ◆ UPON REACHING 50,000 TOKENS PER MONTH - AN INCREASE IN EARNINGS BY 4%
- ◆ UPON REACHING 100,000 TOKENS PER MONTH - AN INCREASE IN EARNINGS BY 8%

This additional percentage will be determined each month based on your turnover.

SOCIAL INITIATIVES

AVRORA+

Avrora+ is actively working on expanding its model by integrating key social initiatives.

These updates not only enrich the gaming environment but also reinforce Avrora+'s commitment to improving social interaction and the educational betterment of players.

SOCIAL INTERACTION

01

The main element of the updated Avrora + model is the active social interaction of players. We provide a variety of forms of communication that allow players to strengthen their connections within the gaming community.

Moreover, we encourage players to participate in social events and initiatives, expanding the boundaries for social communication and learning.

EDUCATIONAL ENGAGEMENT

02

One of the key areas of Avrora+ is using our platform to promote educational initiatives.

The game not only educates players on the features of the gameplay but also offers a variety of educational programs aimed at developing the skills of the players and expanding their knowledge.

GAMES AND EDUCATION

03

Many studies confirm the positive impact of computer games on the educational process. They promote the development of critical thinking, increase the level of concentration and improve problem-solving skills. At Avrora+, we take advantage of this idea by integrating educational elements into the gameplay to help players become more educated and enjoy the game at the same time.

REFERRAL SYSTEM

The leader can withdraw his referral rewards in the general order. No restrictions.

1ST LINE: 5%

4TH LINE: 0.5%

7TH LINE: 0.1%

2ND LINE: 2%

5TH LINE: 0.2%

8TH LINE: 0.05%

3RD LINE: 1%

6TH LINE: 0.1%

9TH LINE: 0.05%

REWARD SCHEME:

NFT for **1100** gives access to 1-6 lines

NFT for **5500** gives access to 1-8 lines

NFT for **11000** gives access to 1-9 lines

ADD. PRIVILEGES

We are introducing an additional referral system into the game

It works according to the matrix principle: a limited volume is set for each line. The bonus generators from this system cannot be withdrawn with AVR, as opposed to the usual ones you can buy on the marketplace. When all slots are filled in a certain line, you get the corresponding partner NFT:

LINE	THE NUMBER OF REFERRALS	PARTNER NFT	MINES IN THE BASIC CONFIGURATION	
			AVR PER MONTH	AVR PER DAY
1	3	NFT ROBOT 11	2,0	0,06
2	9	NFT-TURBOGENERATOR 55 MINI	10,5	0,35
3	27	NFT-TURBOGENERATOR 110 STANDART	22,0	0,73
4	81	NFT-TURBOGENERATOR 550 UNCOMMON	115,0	3,83
5	243	NFT-TURBOGENERATOR 1100 RARE	240,0	8,0
6	729	NFT-TURBOGENERATOR 5500 EPIC	1250,0	41,66
7	2187	NFT-TURBOGENERATOR 11 000 LEGENDARY	2600,0	86,66
8	6561	NFT-TURBOGENERATOR 55 000 UNIQUE	13500,0	450,00

When filling out a new line, your partner NFT is changed to NFT of a higher level. For example, when you complete the 1st line - you get credited with NFT-Robot 11. When you complete the 2nd line, your NFT Robot 11 is changed to NFT Turbogenerator 55 Mini.

Your partner NFT will be in your personal account in the Aurora marketplace. Payment of all costs of the generator is carried out at the expense of the company. You do not need to replenish gas, pay depreciation, etc.

INCREASED PRODUCTION OF GENERATORS FOR STAGE IMPLEMENTATION OF THE TARIFF PLAN

CONSTANT PERCENTAGE		FLOATING PERCENTAGE	
MEMBER RANK	ADD. PERCENT	TURNOVER PER MONTH	ADD. PERCENT
 PARTICIPANT	0%	0	0%
 BRONZE	0,5%	1000	0,5%
 SILVER	1%	5000	1%
 GOLD	2%	10000	2%
 EMERALD	4%	50000	4%
 DIAMOND	8%	100000	8%

ROADMAP

1st quarter 2022

- Application development and website creation.
- Development of project tokenomics.

2nd quarter 2022

- Creation of limited NFT generators and implementation of their modernization.
- Implementation of AVR token burning technology (with each purchase of additional parts by the user to avoid hyperinflation).

3rd quarter 2022

- Airdrop.
- Release of the mobile version of the application.
- The official launch of the project.
- Hosting international promo events.
- Gradual organization of mining farms and the introduction of online broadcasting of their work.

4th quarter 2022

- Creation of a P2P platform and marketplace.
- Adding the NFT generators to the marketplace.
- Creation of an exclusive collection of generators.
- Listing of the AVR token on DEX exchanges.
- Creation of a decentralized autonomous organization (DAO).

1st quarter 2023

- Adding the "Generator Maintenance" deflationary mechanism to the application.
- Launching the web version of the application.
- Mobile app design update.
- Development of mining heating equipment.
- Release of the NFT-generator "Aurora Partner".
- Active entry into the Turkish market.
- Conducting a meeting of project leaders.
- Holding major international forums.

2nd quarter 2023

- Active entry into the Asian market.
- Holding major international forums.

3-й квартал 2023

- В честь годовщины запуска проекта проведение массового мероприятия и проведение Аирдропа действующим и новым участникам.
- Выход токеномики токена MetaAVR.
- Расширение майнинг-ферм.

4th quarter 2023

- The release of a limited edition collection of NFT generators.
- Opening another location for bitcoin mining.

1st quarter 2024

- Bringing the number of mining farms to 1000.

AVRORA CUSTOMER PATH

STAGE 1

START AND REFERRALS

- Download the application
- Registration using a referral code.
- Inviting referrals

STAGE 2

BUYING AN NFT GENERATOR

- Replenishment of the wallet with AVR tokens
- Buying an NFT generator of the selected class
- Getting Started with the NFT Generator

STAGE 3

GENERATOR UPGRADE

- Gradual improvement and maintenance of the NFT generator
- AVR token staking to achieve profitable interest
- Reinvestment and increase in profits of generators

STAGE 4

SWITCHING TO PRO AND BONUSES

- Leveling up to PRO or PRO MAX
- Subsequent distributions of BTC from the mining farms of the company
- Daily rewards for adhering to game mechanics

	Current generator drum D70	53,3 MAVR	+ 11,1 MAVR	16 days
	Multi-shaft rotation ST3	71,0 MAVR	+ 14,5 MAVR	17 days
	Connecting gusset E2	84,4 MAVR	+ 17,2 MAVR	18 days
	Hydraulic damper MB	97,7 MAVR	+ 19,9 MAVR	19 days
	Centrifugal clutch M6	137,9 MAVR	+ 28,1 MAVR	20 days

NFT-TURBOGENERATOR 1 10 STANDART 20SV

Price: **1 10 MAVR** Initial emission: **10 000 UNITS** Total quantity: **67 000 UNITS**

Monthly income in MAVR:

In the basic configuration (level 0):	22 MAVR
In PRO configuration (level 15):	126,5 MAVR
In PRO MAX configuration (level 20):	240 MAVR

Profitability may vary individually depending on the life of the NFT generator (see page 10) and on the cost of consumables for the operation of the generator (see page 8).

	Radiator B3CE	6,09 MAVR	+ 1,57 MAVR	24 hours
	Charger EG180R81	6,90 MAVR	+ 1,78 MAVR	2 days
	Vortex wheel 9LX	8,12 MAVR	+ 2,09 MAVR	3 days
	Vortex wheel 6ZU	10,15 MAVR	+ 2,61 MAVR	4 days
	Ventilation nipple R7EE	16,24 MAVR	+ 4,18 MAVR	5 days
	Pneumatic cylinder Y78D0	20,30 MAVR	+ 5,22 MAVR	6 days
	Adapter sleeve L8H4L0	23,55 MAVR	+ 6,06 MAVR	7 days
	Sensor H7D9L0	24,36 MAVR	+ 6,20 MAVR	8 days
	Coaxial adapter J9D6L3	28,42 MAVR	+ 7,30 MAVR	9 days
	Adapters 1E56	36,54 MAVR	+ 9,40 MAVR	10 days
	Corrugated flue K4D8	38,57 MAVR	+ 9,92 MAVR	11 days
	Signal sensor lamps	40,60 MAVR	+ 10,45 MAVR	12 days
	ET65 plugs	44,66 MAVR	+ 11,50 MAVR	13 days
	Drive gear D2	48,72 MAVR	+ 12,54 MAVR	14 days
	Ring D8D	52,78 MAVR	+ 1,78 MAVR	15 days
	Current generator drum D70	70,08 MAVR	+ 13,68 MAVR	16 days
	Multi shaft rotation ST3	93,44 MAVR	+ 18,1 MAVR	17 days
	Connecting gusset E2	110,96 MAVR	+ 21,5 MAVR	18 days
	Hydraulic damper M8	128,48 MAVR	+ 24,9 MAVR	19 days
	Centrifugal clutch M6	181,04 MAVR	+ 35,1 MAVR	20 days

NFT-TURBOGENERATOR 550 UNCOMMON GS 1000-2R

Price: **550 MAVR** Initial emission: **2 000 UNITS** Total quantity: **20 000 UNITS**

Monthly income in MAVR:

In the basic configuration (level 0):	115 MAVR
In PRO configuration (level 15):	264 MAVR
In PRO MAX configuration (level 20):	1,250 MAVR

Profitability may vary individually depending on the life of the NFT generator (see page 10) and on the cost of consumables for the operation of the generator (see page 8).

	Spiral disc I4FR	7,60 MAVR	+ 2,23 MAVR	24 hours
	Bearing O83	8,62 MAVR	+ 2,53 MAVR	2 days
	Diffuser PDG78	10,10 MAVR	+ 2,98 MAVR	3 days
	Toroidal magnet P4	12,70 MAVR	+ 3,72 MAVR	4 days
	Fan wing T12	20,30 MAVR	+ 5,96 MAVR	5 days
	Flywheel impeller D94	25,30 MAVR	+ 7,47 MAVR	6 days
	F1 Flange	29,40 MAVR	+ 8,64 MAVR	7 days
	Compressor OE1	30,45 MAVR	+ 8,94 MAVR	8 days
	Compressor OE2	35,50 MAVR	+ 10,43 MAVR	9 days
	Bearing 67E1	45,60 MAVR	+ 13,41 MAVR	10 days
	F2 Flange	48,61 MAVR	+ 14,15 MAVR	11 days
	Nozzle ET87	50,72 MAVR	+ 14,90 MAVR	12 days
	Discs LGO 1	55,80 MAVR	+ 16,39 MAVR	13 days
	Cooling system IU76	60,90 MAVR	+ 17,88 MAVR	14 days
	Tubes D9K2	65,90 MAVR	+ 19,37 MAVR	15 days

	Multi shaft rotation ST3	710,8 MAVR	+ 157,0 MAVR	17 days
	Connecting gusset E2	844,0 MAVR	+ 187,0 MAVR	18 days
	Hydraulic damper M8	977,0 MAVR	+ 216,0 MAVR	19 days
	Centrifugal clutch M6	1377,0 MAVR	+ 305,0 MAVR	20 days

NFT-TURBOGENERATOR 1 100 RARE G-180-M

Price: **1 100 MAVR** Initial emission: **1 000 UNITS** Total quantity: **10 000 UNITS**

Monthly income in MAVR:

In the basic configuration (level 0): **240 MAVR**

In PRO configuration (level 15): **1,375 MAVR**

In PRO MAX configuration (level 20): **2,600 MAVR**

Profitability may vary individually depending on the life of the NFT generator (see page 10) and on the cost of consumables for the operation of the generator (see page 8).

	Magnetic extension M51	60,90 MAVR	+ 17,02 MAVR	24 hours
	Afterburner LD34	69,02 MAVR	+ 19,29 MAVR	2 days
	Centrifugal clutch KU-78	81,20 MAVR	+ 22,70 MAVR	3 days
	Thrust bearing washer R1	101,50 MAVR	+ 28,37 MAVR	4 days
	Axial fan TA1	162,40 MAVR	+ 45,40 MAVR	5 days
	Fans D68	203,00 MAVR	+ 56,75 MAVR	6 days
	H-48 minelayer	235,48 MAVR	+ 65,83 MAVR	7 days
	Axial fan TA2	243,60 MAVR	+ 68,10 MAVR	8 days
	Whirl wheel JF9	284,20 MAVR	+ 79,45 MAVR	9 days
	Terminal block UY7	365,40 MAVR	+ 102,15 MAVR	10 days
	Pump chamber	385,70 MAVR	+ 107,82 MAVR	11 days
	Holder R309	406,00 MAVR	+ 113,50 MAVR	12 days
	Power Supply	446,60 MAVR	+ 124,85 MAVR	13 days

	Current generator drum D70	703,0 MAVR	+ 149,0 MAVR	16 days
	Multi-shaft rotation ST3	934,0 MAVR	+ 232,0 MAVR	17 days
	Connecting gusset E2	1109,0 MAVR	+ 269,0 MAVR	18 days
	Hydraulic damper MB	1284,0 MAVR	+ 269,0 MAVR	19 days
	Centrifugal clutch M6	1810,0 MAVR	+ 269,0 MAVR	20 days

NFT-TURBOGENERATOR 5500 EPIC R-TURBO-Z

Price: **5 500 MAVR** Initial emission: **200 UNITS** Total quantity: **2 000 UNITS**

Monthly income in MAVR:

In the basic configuration (level 0):	1,250 MAVR
In PRO configuration (level 15):	2,860 MAVR
In PRO MAX configuration (level 20):	13,500 MAVR

Profitability may vary individually depending on the life of the NFT generator (see page 10) and on the cost of consumables for the operation of the generator (see page 8)

	Speed shaft	76,12 MAVR	+ 24,15 MAVR	24 hours
	Sliding sleeve	86,27 MAVR	+ 27,37 MAVR	2 days
	Clutch gear	101,50 MAVR	+ 32,20 MAVR	3 days
	Cable R4	126,87 MAVR	+ 40,25 MAVR	4 days
	Reducer H-74	203,00 MAVR	+ 64,40 MAVR	5 days
	Retractable plug	253,75 MAVR	+ 80,50 MAVR	6 days
	Shaft DF8	294,35 MAVR	+ 93,38 MAVR	7 days
	Fan D91	304,50 MAVR	+ 96,60 MAVR	8 days
	Fan D92	456,75 MAVR	+ 79,45 MAVR	9 days
	Terminal block UY7	365,40 MAVR	+ 144,90 MAVR	10 days
	Power unit	482,12 MAVR	+ 152,95 MAVR	11 days
	Retractable board OD-1	507,50 MAVR	+ 161,00 MAVR	12 days
	Cable R13	558,25 MAVR	+ 177,10 MAVR	13 days
	Cable R100	609,02 MAVR	+ 193,20 MAVR	14 days
	Built-in amplifier T43	659,75 MAVR	+ 209,30 MAVR	15 days
	Current generator drum D70	5333,0 MAVR	+ 1276 MAVR	16 days
	Multi-shaft rotation ST3	7108,0 MAVR	+ 1702 MAVR	17 days
	Connecting gusset E2	8440,0 MAVR	+ 2021 MAVR	18 days
	Hydraulic damper M8	9773,0 MAVR	+ 2340 MAVR	19 days
	Centrifugal clutch M6	13771,0 MAVR	+ 3301 MAVR	20 days

NFT-TURBOGENERATOR 1 1000 LEGENDARY R-TURBO-10

Price: **1 1 000 MAVR** Initial emission: **100 UNITS** Total quantity: **1000 UNITS**

Monthly income in MAVR:

In the basic configuration (level 0):	2,600 MAVR
In PRO configuration (level 15):	14,850 MAVR
In PRO MAX configuration (level 20):	28,000 MAVR

Profitability may vary individually depending on the life of the NFT generator (see page 10) and on the cost of consumables for the operation of the generator (see page 8).

	Roller support HDB	609,00 MAVR	+ 183,75 MAVR	24 hours
	3DDF fan	690,20 MAVR	+ 208,25 MAVR	2 days

NFT-TURBOGENERATOR 1 10 000 GT TRUE PARTNER

Price:

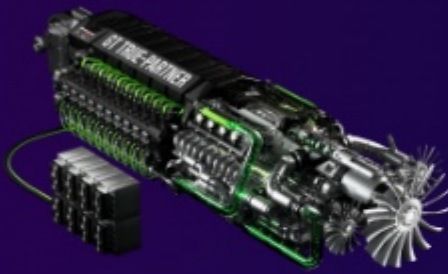

1 10 000 MAVR

Initial emission:

10 WT.

Total quantity:

20 WT.

Monthly income in MAVR:

In the basic configuration (level 0):

28,000 MAVR

In PRO configuration (level 15):

159,500 MAVR

In PRO MAX configuration (level 20):

300,000 MAVR

Profitability may vary individually depending on the life of the NFT generator (see page 10) and on the cost of consumables for the operation of the generator (see page 8)

	Pump GD9	6090 MAVR	+ 1974 MAVR	24 hours
	Bushing DB3	6902 MAVR	+ 2235 MAVR	2 days
	Pressure regulator D99	8120 MAVR	+ 2630 MAVR	3 days
	Supply pipes 57B68	10150 MAVR	+ 3287 MAVR	4 days
